

# BTK2 Project

Type of Project	Building work for a underground car parking of a business centre
Purpose of Piling	Retaining Wall
Site Location	St.Petersburg, Russia
Duration of Work	From Nov. 2008 to Mar. 2009
Client	Private Investor
Piling Contractor	Ovatsia
Press-in System	Standard Press-in
Press-in Material	Z Sheet Pile AZ37-700 L=24.0m 360 pieces
Press-in Machinery	ECO700S
Method Description	The construction site is surrounded by 100 year old buildings. The Press-in method was selected for the sheet piling work to prevent consequential damages by vibration from conventional piling rigs.
